

EasySleeve SuperStretch

SLE

SLEEVE

EasyGel suction suspension sleeve - No Fabric

ALPS EasySleeve SuperStretch provides comfort and durability while still providing strength through suction suspension. The SLE allows freedom of knee flexion as well as achieving secure suspension by sealing with the skin without restricting circulation.

By using a separate fabric cover, the EasyGel is able to move with the user, therefore reducing the forces against the patella and allowing the bulk of the sleeve to be displaced away from the popliteal area.

Features and Applications:

- Minimizes compression and irritation proximally
- Longer lengths to accommodate more users
- Contains an antioxidant for use on delicate skin
- A fabric cover (sold separately) protects the sleeve
- Recommended for waterproof prosthesis

PRODUCT NO.

Description

SLE-XX	EasySleeve Super Stretch, 6mm uniform
CSLE-XX	Cover for use with SLE

XX indicates size. For details please see the sizing chart in the back page.
